

## BrakePlus Braking Performance Report

### Trailer details:

---

Vehicle operator :	ABCDEF Logistics
TIP Reference No :	654321
Fleet No :	ABCDEF01
Chassis No :	123456

### Braking performance details:

---

Braking Performance Value :	xx.x % of g
Report Date :	month dd yyyy
Date Range :	dd/mm/yyyy to dd/mm/yyyy
Duration :	xx days
Number of Brake Events :	nnnn
Margin of Error :	x %

### Result:

---

PASS

#### Note

'Date range' is the period to which the Braking Performance Value applies

'Margin of Error' is defined in the DVSA 'EBPMS Industry Standard Specification' document

If the result indicated is 'Unknown', it is likely that **BrakePlus** has insufficient braking event data to be able to produce a valid Braking Performance Value. An alternative method may be required to assess braking performance.

If the result indicated is 'Fail' (or if BrakePlus otherwise identifies braking deficiencies), the vehicle operator, as defined in the DVSA 'EBPMS Industry Standard Specification' document, needs to ensure appropriate action is taken to investigate, remedy and evidence any reported defects, as detailed in the DVSA publication 'Guide to Maintaining Roadworthiness'.
