

# TIP VEHICLE INSPECTION

TIP Vehicle Inspection is a driver mobile web application enabling damage management in a more transparent, efficient, and sustainable manner. From a sustainability perspective, it replaces wasteful paper-based inspections, decreases carbon footprint by minimizing workshop visits, and reduces fleet downtime.

Designed for “bring your own device” (BYOD) policies, the solution is, therefore, suitable for use by subcontractors and agency drivers. Furthermore, third-party asset and app users can be easily added.

Inspection reports can be accessed via FleetRadar, TIP's 24/7 self-service interactive customer portal. With increased transparency, repair management is simplified both locally and remotely.

## What are your benefits as TIP Vehicle Inspection app user

- Reduce your repair expenses by up to 35%
- Save time on repair and inspections
- Recover your repair costs from hauliers by up to 75%
- Safe vehicles - safe driving
- Preserve the investment in your brand
- Standardised/Customised reporting for your fleet
- Higher visibility/transparency across your organisation

- Create inspection reports with photos
- Customised inspection check list
- Supported in 14 languages
- TIP Insight Customer Support in your local language

## How it works:

Reach out to your local TIP contact for more information  
Visit our webpage at [tipeurope.com](http://tipeurope.com)

The TIP Vehicle Inspection App contributes to my daily work. I can schedule in advance; repairs are done in no time and the customers walk out of the workshops with a big smile!

Melvin ter Wee  
Mechanic of the Year 2022, TIP Workshop Ommen

For me TIP Vehicle Inspection means less time spent on estimating and waiting for approval, and more time on repairs. For our customers, it also means less time off-road for vehicles and more control over cost and quality.

Pascal Filippini  
Branch Director, TIP Marseille
